

Optical 8-Port Selector Switch

EM316-OSW8

Features

- Eight selectable optical LC ports
- Low insertion loss (2.5 dB)
- C-band and L-band range (1528 nm – 1610 nm)
- Hardware configurability
- Fiber Driver management compatibility
- Hot-swap support
- One-slot Fiber Driver module

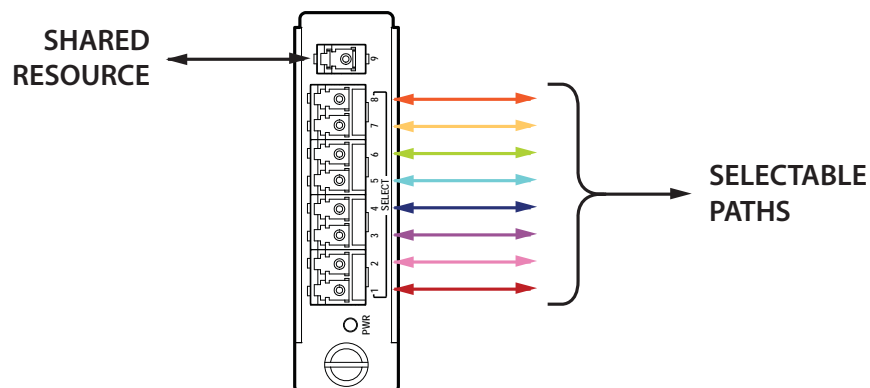

Overview

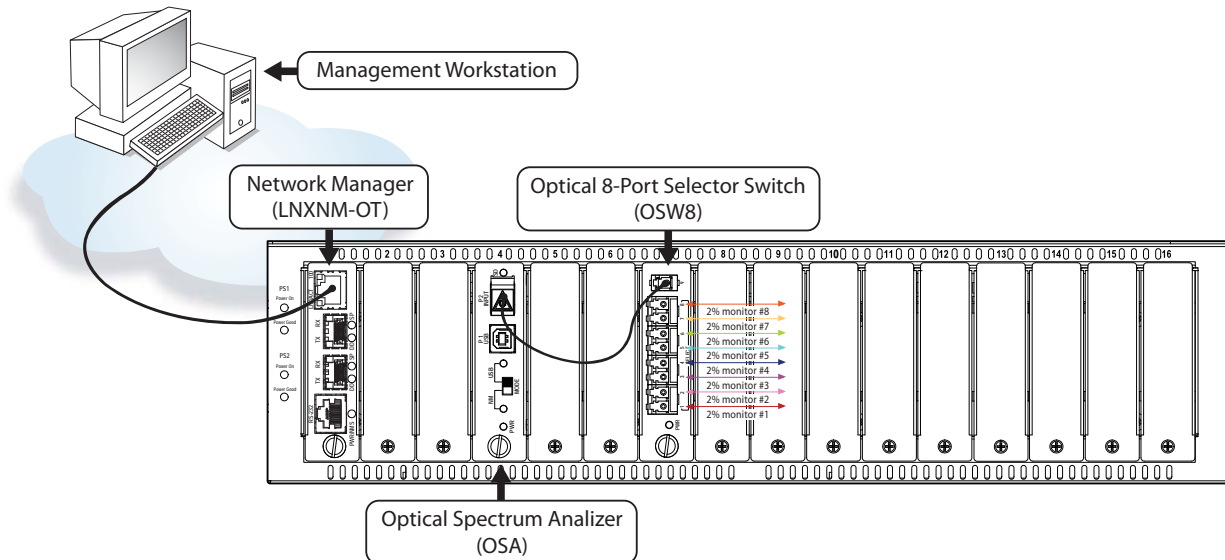

The Optical 8-Port Selector Switch (OSW8) maps a common optical port to any of the eight selectable optical ports. With a low insertion loss and steady switching operation, the module allows cost-effective sharing of expensive test and measurement equipment on the common port. More generally, the OSW8 simply selects one of eight data routes through the module.

One application of the OSW8 allows the Fiber Driver Optical Spectrum Analyzer (OSA) to monitor up to eight independent data ports for powerful remote network administration.

The Fiber Driver network manager (LNXNM-OT) module provides remote access to the OSW8 switch to select the data path from anywhere on the network. The same manager also controls all other Fiber Driver modules within the chassis for additional capital investment value.

Physical Specifications

Operating Temperature:	-0°C to 50°C (32°F to 122°F)
Storage Temperature	-40°C to 85°C (-40°F to 185°F)
Relative Humidity	85% maximum, non-condensing
Physical Dimensions (W x H x D)	25 mm x 75 mm x 175 mm deep (1" x 3" x 7" deep)
Approximate Weight	450 grams (16 oz)
Regulatory Compliances	FCC Part 15 (Class A); IC (Class A); EMC Directive: Emission (Class A) and Immunity; RoHS Directive; China RoHS; REACH Directive; WEEE Directive; The Quality Management System is certified to ISO 9001 by QMI-SAI Global The Environmental Management System is in compliance with ISO 14001
