

## **MRV is participating in the Annual MPLS World Congress**

**February 15<sup>th</sup> and 18<sup>th</sup> Paris, France**

Once again, MPLS World will provide attendees with insight into the business and technical strategies that are being discussed and that allow carriers to migrate existing services to an MPLS/VPLS infrastructure.

MRV a leader in VPLS Access solution will provide as always a close look at the evolution of VPLS in the Access. This year we will show examples of VPNs deployments and will also participate in the interoperability event.

### **MRV's Lecture: Virtual Private LAN Services (VPLS) in the Access**

Delivering Ethernet Transparent LAN Services that provides a private LAN-like service across an enterprise's metro sites, VPLS securely interconnects enterprise sites, data centers, Application Host Providers, and extranet supply chain partners.

### **Interoperability Test Event**

At the Interoperability Live Demo, our OptiSwitch Master products will be operating with other core vendors' equipment, providing VPLS solutions for Access Networks.

### **About MRV**

As a publicly owned company since 1992, MRV maintains eight R&D and manufacturing centers in the US, Europe, and the Far East, 50 customer service, support, and sales offices in 21 countries, and distribution partners and resellers world-wide, with more than a quarter of a billion dollars in sales mainly from carrier-class networks.

MRV years of experiences start with some of the first installations of Metro Ethernet networks in the world. MRV's deployments include carriers all over the world starting with pioneer installations of Metro Ethernet solutions in a large City Carriers service providers in Germany in 1998 and network deployments with well-established Metro Ethernet ILEC networks began on a wide scale in Scandinavia, and continued through Europe in the year 2000 with Optical Access deployments for Central Europe ILECs.
